Ukulele Tips: Chords: **G, Em, C, D** — open, resonant shapes perfect for creating that airy Kraftwerk glow.

Keep a slow, steady pulse around 70 bpm; let the chords breathe between changes.

Use a gentle **down-down-up-up-down-up** or fingerpick 4-3-2-1 to mimic the hypnotic synth flow.

If you have a low-G uke, alternate the bass note to add that deep urban hum. Sing softly and evenly, almost whispering — this song is about atmosphere, not performance.

Let the final G ring out into silence, like a streetlight fading at dawn.
