OUTRO

Ukulele Tips: Chords: ****Am, G, F, E7**** – classic 90s progression, warm and funky.

Strumming: ****down-down-chuck-up-down-chuck****; keep it percussive and steady around 110 bpm.

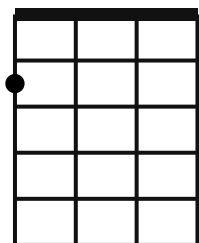

Mute the first downstroke of each bar with your palm for that “kick drum” effect.

To mimic the organ groove, play near the bridge with crisp, snappy tone.

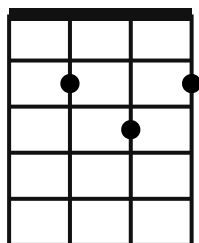

Vocals: deliver it with confidence — this is house gospel, not heartbreak.

Smile when you sing it. That's the secret.
